

Scholarship for International Students in the
Department of Mechanical Engineering at National Chung Cheng University

1. The Scholarship for International Students is set-up for outstanding international students who study for degree programs in the Department of Mechanical Engineering at National Chung Cheng University.

2. The funding sources of Scholarship for International Students is allocated by National Chung Cheng University for international students' scholarship.

3. Eligibility

International students enrolled in the master or doctoral programs in the Department of Mechanical Engineering with outstanding academic records.

4. Application Procedure

The application deadlines and procedures are according to “National Chung Cheng University Implementation Policy of the Scholarship Award for International Students, V. Application Deadlines and Procedures.” Applicants should submit the following documents for reviewing process: the application form, original transcript (average grade of the previous semester must be 80 or more), research achievements, and other favorable documents. The research achievement includes:

(A) Journal paper

The journal papers affiliated with National Chung Cheng University are classified into four levels from Q1 to Q4, and given as the points listed in the following:

Q1: 13 points (if you get the best paper or similar award, add 2 points)

Q2: 8 points (if you get the best paper or similar award, add 2 points)

Q3: 3 points (if you get the best paper or similar award, add 2 points)

Q4: 1 point (if you get the best paper or similar award, add 2 points)

(B) Patent and technology transfer

(a) According to the nationality and patent type, the patents are classified into four categories, and given as the points listed in the following:

(i) US, EU invention patent: 8 points

(ii) Japanese and Korean invention patents: 5 points

(iii) Taiwan, China invention patent or EU new patent: 3 points

(iv) Taiwan, China new patent: 1 point

(b) Technology transfer 13 points per case

(C) In the above-mentioned scoring data, if the research achievement is co-authored, the advisor shall indicate the contribution ratio of the applicant, and the actual number of points of the applicant's item is the above-mentioned points multiplied by the contribution ratio. The proportion of contribution is calculated as follows: after deducting the number of all teachers, the contribution ratio of each student is indicated by the contribution of each student, and the total contribution ratio is 100%.

(D) The contribution of the applicant in above-mentioned research achievements can only be used once for applying for the Scholarship for International Students.

5. Review Process

Applicants are ranked based on the average grade of the previous semester from the transcript, the points from the research achievements, and favorable documents, and then awarded scholarships accordingly.

6. Allocation of Living Stipend Amount

(1) 30% for master degree students.

(2) 30% for doctoral degree students in their first two years.

(3) 40% for doctoral degree students in their third or more years.

7. The regulation shall be implemented after the approval of the department administrative meeting. The same procedure shall be carried out when amendments are to be made.
